ORDER

On October 29, 2018, plaintiffs filed an unopposed motion requesting permission to exceed the page limit by twenty pages when responding to defendant's motion to dismiss and filed another motion seeking additional time to file an amended complaint. The court **GRANTS** the motion requesting permission to exceed the page limit and **DENIES AS MOOT** the motion seeking additional time to file an amended complaint because that motion concerns relief that was already granted.[1]

IT IS SO ORDERED.

[1] Plaintiffs appear to have erroneously filed the latter motion because the motion is an exact duplicate of one filed on February 21, 2018, which contained plaintiffs' request for permission to file an amended complaint by March 8, 2018. The court already granted that request in its February 21, 2018 order.
